

INTELLECTUAL PROPERTY SERVICE PLATFORM SUITABLE
FOR MODERN SCIENCE AND TECHNOLOGY

MARCH 2015

AMOUNT NOSE ICE BAG

Amount nose ice bags, including: a square corresponding to the forehead of ice bags, ice bags corresponding to the nose wing, nose has a corresponding groove strip ice bag, ice bag connected to the bottom of the square two one of the wing ice bags, ice bags of the two wing-shaped bag connected by a strip of ice, the ice bag placed in a fixed square kit, connect the extension to the fixed sleeve bands.

The utility model is the amount of ice bags nose for nasal trauma, epistaxis and nasal surgery ice materials with ease pain, reduce nasal bleeding, reduce the advantages of nasal edema.

AMUSING POISON-FILTERING TOBACCO PIPE

The utility model relates to an amusing poison-filtering tobacco pipe which is mainly composed of a smoke pan poison-filtering device, a poison-filtering tobacco pipe, a body casing, an impeller wheel, a rotating shaft, a game object, a smoking pipe, etc.

When the utility model is used for smoking, the utility model has the function of poison filtration, and simultaneously, the game object can perform various movements for being appreciated by people.

ANIMAL FOAMING CONCRETE WALL BLOCK

The foamed concrete wall block with animal material consists of flyash 20-30 weight portions, cement 50-60 weight portions, lime 8-10 weight portions, and animal foaming agent 10-12 weight portions.

The present invention has excellent heat insulating performance as high as 20-35 times that of common concrete block, high sound absorbing performance as high as 5-6 times that of common concrete block, low bulk density as low as 0.1-0.2 times that of common concrete block, low absorption to ensure high stability, and high antivibration performance.

ANIMAL PRODUCT HAVING NO POLLUTION TO THE ZOOLOGY AND ABLE TO BE APPLIED AS GREEN PRODUCT AND THE PREPARING METHOD THEREOF

The invention uses fine and rough forge composite microbe high-speed ferment agent to produce the fine and rough ferment and full-valve ferment forge used in animal cultivation, uses standard animal ferment wet forge cultivation method to obtain the standard living animals relative to slaughter production.

The invention can save rice, with high adaptability, wide application, simple operation, high quality or the like.

ANTI-CONFUSING BEVERAGE BOTTLE

An anti-confusing beverage bottle comprises a beverage bottle body and adhesive labels.

The anti-confusing beverage bottle is characterized in that a plurality of adhesive labels are connected on the surface of the beverage bottle body.

The anti-confusing beverage bottle has the advantages of being simple in structure, convenient to use, and capable of avoiding confusing between beverage bottles effectively due to the fact that the adhesive labels are combined to form different shapes.

APPETIZING SPLEEN TONIFYING CRISPY CAKES

The appetizing spleen tonifying crispy cakes are simple in manufacturing technology, rich in nutrition, sour, sweet and palatable, extractive of the poria cocos, the bighead atractylodes rhizomes, the rubiaceae borreria stricta and the malt is added, so that the appetizing spleen tonifying crispy cakes have the functions of relaxing bowels, lubricating the intestines, invigorating the stomach and tonifying the spleen, and the extractive of the lotus leaves and the cassia seeds is added, so that the appetizing spleen tonifying crispy cakes have the good functions of fat burning and weight reducing.

BAG AS AMUSING CAP

The utility model relates to an article containing bag which can be used as an amusement cap, which comprises a bag mouth, a bag face, a bag bottom and carrying rings.

The utility model is characterized in that the bag bottom arches toward the bag mouth of which the lower part is provided with belts used as cap belts.

The utility model with novel idea can be used as a gift bag as well as a sunbonnet and an ornamental cap in amusement occasions, such as an emperor's cap, a Napoleon military cap, etc.

BAG FOR RECEIVING BLOOD OUTFLOWING FROM NOSE

The blood or secretory products outflowing from the nasal cavity of the patient can flow into the waste containing bag and the blood sprayed out from the oral cavity is stopped by the waste containing bag, so that the blood sprayed out from the oral cavity can be avoided being sprayed onto the face of a doctor.

The bag for receiving the blood outflowing from the nose has a simple structure and is convenient to use.

CHILDREN'S WARM HAT WITH LIGHT PROTECTION

A child warm hat with light protection, including wind and sand clear lenses, skin scarf, decorative electronic lamps, reflective devices, and connected device protective cap, lens connection.

Warm hat with the protective plastic injection molding, through painting, decals, paint from drying.

CONCEALED NOSE MASK

The concealed nose mask comprises soft mask bodies (1), a nose clip (2) and filter combinations (3).

The concealed nose mask is characterized in that the soft mask bodies (1) are disk-shaped bodies with shallow inner cavities, a plurality of purlines

(1.1) are evenly arranged at the disk-shaped bottoms of the disk-shaped soft mask bodies (1), a circle of flange (1.3) which turns up downwards is arranged on the periphery of each disk-shaped mask body (1), and the inside spaces defined by the flanges are containing spaces for the filter combinations (3).

CRAB DATA COLLECTOR

The utility model discloses a crab data collector comprising a shell, a computer mainframe, a sensing module and a conveying module, wherein the computer mainframe processes the collected data through a network and automatically uploads the data to an appointed server; the sensing module is used for collecting the biological characteristic information of the crabs and sequence numbers adhered on the crab bodies; and the conveying module is used for conveying the crabs to data collection windows of the sensing module.

The crab data collector disclosed by the utility model is capable of quickly and automatically collecting the biological characteristic information and production information of the crabs, so that a producer can conveniently and rapidly create an anti-counterfeiting mark system based on biological characteristics, thereby reducing the problem of numerous bogus products, and particularly severe counterfeit origin phenomenon on the market in certain degree.

CRUDE CHOCOLATE SAMPLE COMPOSITION, MANUFACTURING METHOD THEREOF AND DESSERT USING THE SAME

The invention provides a crude chocolate sample composition, a method for manufacturing the crude chocolate sample composition effectively and a novel dessert for using the crude chocolate sample composition with above advantages.

The crude chocolate sample composition has the flavor and taste of the crude

chocolate sample; and the crude chocolate sample composition can maintain the better flavor and taste when circulated for around one year.

DECORATIVE SWAGGER BAG

The decorative swagger bag is made of leather materials, and comprises a bag body, a decorative surface, lifting belts and a decorative part.

The bag body is of a small-end-up bag structure with an opening formed in the upper portion of the bag body and the bottom face of a rectangular structure.

The decorative swagger bag has the advantages of being elegant and fashionable.

DESICCATED COCONUT BISCUIT CAPABLE OF ENHANCING MALE SEXUAL CAPACITY

The invention provides a desiccated coconut biscuit capable of enhancing male sexual capacity according to defects in the prior art.

The desiccated coconut biscuit comprises, by component and weight, 150 parts of flour, 60 parts of powdered sugar, 30 parts of cream, 20 parts of eggs, 15 parts of coconut shred, 0.75 part of baking soda, 0.02 part of antioxidants, 40 parts of vegetable oil, and 10 parts of strengthen yang liquid medicines. The desiccated coconut biscuit capable of enhancing male sexual capacity has functions of strengthen yang and nourishing the kidney, can treat diseases of sterility, impotence and the like, and meanwhile is tasty and delicious.

DINING CLOTHES FOR BABY

The dining clothes comprise a clothes body and a lacing, wherein a perforation is formed in the top of the dining clothes, the lacing penetrates through the perforation, and two semi-circular armholes are formed in the dining clothes.

As the baby grows, they began to try to feed themselves, but because of the

baby's immature coordination, coupled with relatively naughty baby, eating often will clothes dirty clothes to eat the majority of the material on the market rough, will wear the baby's chin, and some water absorption is poor, dirty clothes, soaked red chin.

DISPOSABLE BABY WITH A BALLOON IS INSERTED THROUGH THE NASAL AIRWAY DOUBLE NOSE

For nasal oxygen catheter, nasal continuous positive airway pressure or nasal mechanical ventilation.

Made of soft, flexible material made of cystic nose plug.

The nose plug one end of the nozzle wall rolled up, can be firmly inserted into the trachea through the holes, and the other end has a small opening in the middle cystic entire bladder double nose plug inserted into the nasal cavity.

DISPOSABLE WASTE COLLECTING BAG FOR EAR-NOSE-THROAT DEPARTMENT

The utility model comprises a waste storing bag (1), hot melting seams (5) which are arranged on both sides of the waste storing bag (1), a bag lap (2) which upwards extends and is arranged on one side surface of the waste storing bag (1), a neck line (3) which is arranged at the upper end of the bag lap 2 and a harness (4) which is fixedly connected with the neck line (3).

The utility model can also be used as a bib pocket for patients need feeding or babies.

DOUBLE-ISLAND SHIP TO SHIP WORKER-BEE TRANSPORT PLATFORM

The utility model can be arranged in the sea which is close to any natural navigable waterway.

The utility model comprises a crane.

An inner island and an outer island which are in a mutually parallel mode are positioned in the direction of a water channel.

The working arms of the crane built on the double islands are composed of the area of a storage yard, a ship zone of the worker-bees, and the ship zone of seagoing vessels.

EASY-TO-SUCK INK BOTTLE

The utility model relates to an ink bottle provided with a rubber inner plug.

The ink bottle is characterized in that an ink absorbing hole is arranged on the inner plug.

The ink bottle brings convenience for users.

The time for sucking ink is saved.

The trouble for ink shortage is reduced.

EXTRUDED CORN CAKE AND PREPARATION METHOD THEREOF

The invention relates to an extruded leisure food, in particular to an extruded corn cake with less nutrient loss and easy digestion, and a preparation method thereof.

The cake added with the extruded corn meal has soft mouthfeel, slight toughness and fragrant smell in the eating, and can be eaten for a long time in leisure, travels, outdoors and the like.

FISH MEAT HAM SAUSAGE AND PREPARATION METHOD THEREOF

The fish meat ham sausage provided by the invention is rich in proteins and diet fibers; the fish meat is fresh, tender and high in elastic softness; the fish meat ham sausage has traditional color, fragrance and smell and has alcohol flavor; the flavor of the fish meat ham sausage is more delicious than that of the same type of other conventional products.

HAM PLIERS

Disclosed is a pair of ham pliers.

According to the pair of ham pliers, the ham buckle can be clamped conveniently through arrangement of the opening part

of the clamping circle, the ham buckle can be taken from a ham conveniently, and the taken ham buckle is free of a plastic skin.

INFLATED SEX PARTNER

The inflated sex partner is an inflated rubber dummy comprising a pair of artificial breasts made of silica gel and an artificial vulva made of a stainless steel plate, an additionally arranged plastic pipe and a two-layer rubber sleeve capable of being filled with water.

Once husbands of the separated couples have sexual demands, the husbands can operate the inflated sex partner to simulate real sex and release sexual desires reasonably, and a good effect is achieved.

MANKIND HEALTH UNDERPANTS

The healthy underpants are provided with an underpants body (1) suitable for man to wear, inner lining cloth (5) is lined in the crotch part cloth (2) of the underpants body (1), middle lining cloth (3) is lined between the crotch part cloth (2) and the inner lining cloth (5), an inner hole (6) is arranged on the inner lining cloth (5) corresponding to the phallus part and the testis part of the human body, and a middle hole (4) is arranged on the middle lining cloth (3) corresponding to the phallus part of the human body.

After the healthy underpants are worn, the testes are between the inner lining cloth (5) and the middle lining cloth (3), the phallus is between the middle lining cloth (3) and the crotch part cloth (2), the phallus does not mutually and directly contact and rub with the testes, the testes do not mutually and directly contact and rub with the skin at the inner side of the thigh, sweat is uneasy to be generated and gathered, so that the wearing is comfortable and also healthy.

MASK CONVENIENT TO USE

The mask convenient to use comprises a mask body.

A warm-keeping nose wing paster corresponding to the nose wing of a user in shape is mounted in the mask body.

The inner surfaces, on the two sides of the warm-keeping nose wing paster, of the mask body are respectively provided with an opening.

Each opening is filled with a detachable warm-keeping cheek pad.

The warm-keeping nose wing paster corresponds to the nose of the user in shape and can keep the nose warm.

METHOD FOR PRODUCING SMELLY, SPICY AND SALTY DUCK EGGS

The method comprises the following steps of: mixing smelly and spicy auxiliary ingredients with main ingredients to obtain a mixture to be eaten freely by ducks in the egg producing period, and marinading duck eggs in a smelly and spicy marinade.

Because the smelly and spicy auxiliary ingredients are added into the main ingredients, the fresh eggs laid by the ducks freely eating the mixture of the smelly and spicy auxiliary ingredients and the main ingredients contain a trace amount of smelly and spicy components.

The smelly, spicy and salty duck eggs have pleasant taste and can stimulate the appetite.

MIDDAY REST BACKREST FIXING MEASURE OF OFFICE

Parts of the working class have about 1 hour of rest time at the noon; and parts of people lean on chairs to take a snap in order to be full of energy to work at the afternoon, so that the people are easy to trip in a blurred motion to collide and damage human bodies.

The midday rest backrest fixing measure of the office has the beneficial effects

of reducing the situation that the human body moves unconsciously because people is in a daze in a sleep process and reducing the damages to the human body caused by colliding articles of the office; and therefore, the working class can have the rest at a relieved state and the rest quality is improved.

MIND AND BODY RECREATION KETTLE

The mind and body recreation kettle comprises a kettle opening, a kettle neck and a kettle body, wherein the kettle opening, the kettle neck and the kettle body are sequentially connected.

The structure of the mind and body recreation kettle is similar to a flower bottle, and the mind and body recreation kettle is a piece of craftwork, can be used for furnishing and beautifying the environment, plays a role in recreation, satisfies requirements of people for multi-aspect using and achieves the purposes of recreating and keeping bodies and mind healthy.

MULTIFUNCTIONAL SNACK VEHICLE

The utility model discloses a multifunctional combined snack barrow which comprises an oven, an iron plate, a spicy hot boiler and a gas burner.

The oven, the iron plate and the spicy hot boiler are arranged side by side at the upper part of the snack barrow; the gas burner is arranged at the lower part of the iron plate and the spicy hot boiler.

The combined snack barrow combines various snacks production tools, has simple structure, compact and smart size, convenient use, and can be used for making various snacks.

NASAL FEEDING BAG WARMER FOR MENTAL PATIENT

A psychiatric patient nasogastric bag warmers, characterized in that it comprises a transparent body warmed sandwich bag sets, within the sandwich filling HTF; heating said sandwich bag sets

nasal cavity size and shape of the bag accordingly.

NAUGHTY POLYURETHANE RECREATION CASTLE

The naughty polyurethane recreation castle is provided with a castle body and is characterized in that nanoscale polyurethane rubber is sprayed on the surface of the castle body, a layer of polyurethane paint is sprayed on the polyurethane rubber, and the naughty polyurethane recreation castle is provided with an ultraviolet disinfection device and a fixing device.

The naughty polyurethane recreation castle has the advantages of being safe, hygienic, beautiful, excellent in abrasion resistance, high in strength, good in elasticity, free of cracking, good in buffering and shock-absorption performance, and good in resistance to oil and chemical reagents, achieving a high friction coefficient, good resistance to low temperature, ozone and radiation, good adhesive performance and a wide application range, and being diversified.

NOSE WARM

The nose warm, comprising including from non-toxic, odorless cavity made of medical silicone, characterized in that: the top of the cavity is provided with a mounting bracket, a fixed bracket is provided with a vertically rotatable inner auxiliary stand, disposed inside the cavity there are medical warm fleece.

ONE KIND OF PILLOW

The present invention provides a pillow, the pillow in the middle of the pillow is provided with an oval recess hole, the hole has an oval recess snorkel and pillow body communication.

The present invention is mainly used for tummy sleeping face down pillows use, when used, is located in an oval face down concave hole, because equipped with snorkel and pillow in vitro interlinked, allows people to breathe, especially for school student lunch on the desk Pashui use.

PENIS ABSORBING CONDOM

A penis absorbing condom is characterized in that a main body of the condom is manufactured into a coronary structure, sucking discs and a seminal vesicle are arranged inside and outside of a sucking disc base (3) of the coronary structure, the seminal vesicle (1) for collecting semen is arranged outside the sucking disc base (3), a semen passage opening (2) where semen can pass through is formed in the center of the sucking disc base (3), two sucking disc rings, namely an inner ring sucking disc (4) and an outer ring sucking disc (6), are arranged inside the sucking disc base (3), and a ventilation hole (5) is formed between the two sucking discs on the sucking disc base (3).

PILLOW FOR AFTERNOON NAP

The pillow for an afternoon nap is characterized in that the pillow for afternoon nap is composed of a head rest, a head curtain, a pocket, a lifting belt and a hand hanger, wherein, the head rest is made of a sleeve body and fillers; the side face of the head rest is provided with the pocket and the lifting belt; the head curtain is arranged in the pocket; the eight-shaped hand hanger is hung on the lifting belt.

The utility model can be used as a pillow for an afternoon nap for students and workers, and can also be used for tourists.

PROCESS FOR MAKING PRODUCTS SIMILAR TO QUICK MEAL FOOD

Manufacture of snack food by extrusion of a mixture of the appropriate class of products, the extrudate surface coated with spices and / or spices.

Condiments directly after extrusion and / or spices aqueous suspension applied to the hot extrudate, and then drying.

As a result of coating spices and / or spices, no oils, so the resulting article is easy to digest.

PROCESS FOR MANUFACTURING VALVE FLAP WITH DUNCE CAP

The invention discloses a preparing craft of valve flap with flow guiding hat, which comprises the following steps: providing flow guiding hat; connecting the valve flap body to bolt; producing the top face of the flow guiding hat as streamlined curved face.

This invention possesses reasonable craft and good idea, which can be spreaded widely.

SAUSAGE WITH ODD TASTE

The invention discloses a special flavored sausage which is characterized in that the meat sausage contains: A) meat, B) special flavored soy sauce, C) potato, D) corn, E) salt, alcohol, sugar, monosodium glutamate and spice, F) water.

The invention has the good effects that the invention is balanced in nutrition, modest in hardness and good in taste; the special flavored sausage contains abundant vitamine, protein, amino acid and minerals and is special in taste, with the tastes of delicacy, sweetness, spice and sweet smelling.

Therefore the sausage is suitable for the people of all ages.

SHIRT CONVENIENT TO WEAR

The shirt convenient to wear is provided with a shirt body, and gelatin silk splicing tape is arranged on the edge of a center joint of the shirt body.

The shirt is convenient to fold and unfold.

SIMPLE EGG DOLLY

The simple egg dolly is characterized in that the universal rotation wheels are arranged under the front portion of the egg support bearing plate, and the orientation wheel seat and the orientation wheels are arranged under the back portion of the egg support bearing plate.

The simple egg dolly is simple in structure, easy to manufacture, convenient to use, stable in running, low in cost and suitable for being used by large and small-sized breeding companies, families and individual households.

SPHERE COIN

The invention relates to a sphere coin, belonging to the coin field.

The sphere coin overcomes the defect that the traditional coin is difficult to pick up when being placed on a table or concrete ground.

The invention has the characteristics that the sphere coin is easy to pick up, and the sphere coin can not roll, so that the whole society can save massive time.

The sphere coin is easy to pick up.

STRUCTURE OF HAT BODY

The hat body is a tabulate elastomer.

A small round crown and a large round hat bottom are concentrically arranged on the hat body.

A hat brim is stretched on the periphery of the hat bottom, a plurality of trimming grooves are formed between the crown and the hat bottom in a spiral radial pattern in an isometric mode, a plurality of arc-shaped strips are spaced by the trimming grooves, the crown can stretch the arc-shaped strips to one side through the trimming grooves, and the hat body has the effect that the hat body can be worn on the head.

STUFFY NOSE DREDGE

The utility model belongs to the field of medical technology equipment, specifically a stuffy dredge.

The utility model is a technical solution: including motor and vibration arm, which is characterized in that the front end has a probe vibrating arm, the front end of the probe has a probe.

Has simple structure, at the time of treatment to patients stuffy produce

toxic side effects can be avoided, reducing the difficulty of the work of medical personnel.

SUBSTITUTION FOR FAVOUR GIFT

In order to curb the current vicious cycle of human contact, the invention provides a human substitute, which favors alternatives to replace human contact of monetary and in-kind.

Technology used in the present invention are: to produce a human-specific cards, special pen and stacker.

To produce a human-specific card, the above can be written by a dedicated virtual pen names amount and send cards, special pen is divided into two red and black, respectively, for weddings and funerals in human signature card.

When Joe Smith has a happy event, you can identify the signature of that card gave Joe Smith, and Joe Smith can use this card also has a wedding, sending other friends.

SWADDLE TYPE BIB FOR PREVENTING MILK FROM SPILLING INTO EARS

The swaddle type bib structurally comprises a swaddle blanket and a hood blanket.

By means of the swaddle type bib for preventing the milk from spilling into the ears, an all-around undergarment-shaped enclosing object is formed, the milk can be prevented from spilling into the body of the infant, and thus sanitation and convenience are achieved.

TOMATO MILK

The tomato milk is a tasty and healthy weakly-acidic beverage.

The tomato milk is obtained by mixing qualified milk powder with a proper amount of a tomato juice.

The tomato milk has good effects of spirit raising and brain invigorating, and is suitable for office workers with

large manual and mental labor consumption, growing students, retired old people and patients in the body rehabilitation stage to drink.

WATERPROOF HAT

The utility model relates to a flying saucer type waterproof hat, belonging to the class of individual and household articles.

An airtight seal cavity adhered by charging connectors becomes a cap shape after charging.

No obvious cavities exist on the surface of the hat, and air currents slip from the surface of the hat.

The hat is uneasy to be blown over.

WINE-FLAVORED PIG FEED AND FORMULA PRODUCTION AND FEEDING METHODS THEREOF

Feeding techniques and feed formulation: wine pigs fed twice a day, 8-9 am feeding time, 4-5 pm feeding time, free access to water throughout the day.

Wine pig feed pigs, pork characterized as follows: the bright red color of pork, tender meat, thin, less subcutaneous fat; soft and juicy palate with fragrant feeling; no fishy taste chew, its flavor mellow and sweet, evocative, swallow and not greasy mouth; slaughter rate, good water retention, low shrinkage; cooking time is short, easy to rot-ten meat, do not hang bowl, broth, fresh, fragrant, thick; with physical fitness and beauty tonic effect, nutritious contains more than 20 kinds of amino acids and 20 kinds of vitamins, natural organic meat for the elderly, children, women, students and white-collar workers; safe non-toxic, no hormones, no drug residues, in full compliance with the national organic product certification indicators; wine changes in the quality of pork pigs through specific feed and feeding methods to make different sizes of the same species after a short breeding pigs to form a unified quality standards.
